

Lets you...
Stay In Control

A simple, reliable, economical dilution control system that promotes health, safety, regulatory compliance, and environmental stewardship.

COMPLIANCE MANAGEMENT

Guarantee the right amount of cleaning solution to be used with every application. No more worrying about under or over dilution. The **e.mix** closed-loop system, and sealed containers with a no-spill feature reduces employee contact to chemical concentrates – keeping everyone safe and healthy.

FLEXIBILITY

Enable users to fill buckets, automatic scrubbers, and RTU quart bottles quickly and easily by using the dual-dilution control tip with high flow and low flow adjustments. The wall mounted version is compact and space conscious, while the portable unit allows staff to “take dilution control” directly to the job site to speed up the cleaning process.

HEALTH, SAFETY, AND WELLNESS

Eliminate the potential for employees to be exposed to concentrated chemicals and/or accidentally mix harmful chemicals. Accurate dilution control also protects building surfaces - reducing “wear and tear” on a building. Plus, the concentrated packaging reduces waste and is good for the environment.

A SIMPLE AND COMPLETE PROGRAM

Lower training costs by implementing the **e.mix** Training Program. The dilution control system comes with easy to understand training and communication materials that include color coded application wall charts, and secondary labels. A cost analysis feature permits accurate job tasking and work loading breakdowns.

Stay in control. Use a simple, convenient, compliant, and flexible dilution control system that promotes health and safety for employees and building occupants. See why Facility Managers recognize **e.mix** as a truly effortless and complete solution.

Lets you... Stay In Control

e.mix is the perfect answer for reliable and safe cleaning. The closed-loop, leak resistant system accurately dilutes cleaning concentrates for a variety of applications. The flexible system protects the health and wellness of staff and building occupants by eliminating the exposure to concentrated chemicals as well as the potential for accidental mixing of harmful chemicals.

Facility Managers who care about cost control, safety, and the overall appearance of their buildings appreciate the easy to understand **e.mix** Training Program. A program designed to lower training costs and improve worker safety.

e.mix benefits

- Control chemical costs and budget
- Maintain portion control, safety, and compliance
- Guarantee the right amount of cleaning solution... every time
- Save space with a low profile product design
- Speed up the cleaning process
- Implement through the **e.mix** Training Program
- Reduce waste with environmentally preferable packaging
- Satisfaction and performance guaranteed
